

Task List	Hours
1. Check data format during upload	2
2. Show „current order“ right above price	3
3. Enable upload of another file through “edit” button	2
4. Provide vouchers, e.g. free shipping costs for first delivery, quantity discount, percentage discount on anything or specific bindings, with activation period	8
5. Check to what extent possible: When updating in the middle of an order step, the ordering process should remain in current order step, do not return to first order step.	6
6. If you go back to the first step in the ordering process and change the type of binding, all the following parameters must be entered again	3
7. If a value above the allowed limit has been entered, a message should appear that you must stay within the limit or that you can proceed to a form without limits and price. This form is checked by the admins and then answered with a price suggestion.	6
8. Add CSS for right current order box	4
9. After uploading the file, the calculated number of pages should be displayed.	7
10. Refinement CC: The length X within "book spine X cm" is calculated by the thickness of the paper (to be set in the admin area under paper weight) times the number of sheets + 0.5 mm. In "Link for style sheet" there should be a link with the name e. g. "Conditions own style sheet", with which a PDF document opens, where all conditions for the own style sheet are described, which must be met.	8
11. After selecting the binding type, page format and color, a preview image should be displayed on the right. These images must have been uploaded in the admin area before. Sample images will be provided by the client later.	6
12. A parameter with activatable/deactivatable values must have at least one active value.	3
13. In the list of parameters with an asterisk * it is not directly clear which values are activated/deactivated. You first must click on the “Edit” button to check each value. It is more convenient to display the activation/deactivation flag in the list.	8
14. In binding in the admin area: Beside Cover AA and BB another option “None” should be added which does not offer a parameter.	4
15. In delivery service in the admin area: Add attribute “Link to Shipment Tracking”.	5
16. New menu item "Employees" in the admin area, where you can see the list of employees with their permissions. An employee list can be used to assign different permissions to an employee (see Project_requirements document chapter 1). There are 3 users: Superadmin: has all permissions + can change PW of admins and employees Admin: has all permissions + can change PW of employees Employees: are assigned different permissions	6
17. Admins can add new employees via the menu item "Employees" in the admin area. Via a link to the employee he can set a password. Admin can change employee PW.	8
18. On the main page there should be a picture for each binding. Click on picture leads to menu item product info with info/order. Information shows a gallery with all information on the topic hard cover (hard cover with embossing, hard cover classic, etc.). An order button is also available under product info, which leads to the order form with preset binding.	10
19. After the order, if it was realized that the uploaded file is defect, a link must be sent to the customer with a request to upload a new file.	6
20. Only one billing address, but several shipping addresses possible to send bindings or CDs (s. Amazon)	6
21. For logged in users: After the product is in the shopping cart, it can be edited. It remains there until the order process has been completed or aborted, even if user logs out or browser closes.	5
22. Guest can execute order, but without keeping the product in the shopping cart	8
23. Payment on account only for certain customers. Provide flag for each customer in user area.	6
24. Vouchers with codes must be added in the admin area	5
25. The client can set information text and pictures under "Latest". He can select whether an information text and picture should also be displayed in the slider on the main page. Example pictures for sliders are provided by the client.	6
26. Arrow at fields with drop down list to indicate further values	4
27. better display of spine direction	8
28. CD/DVD: after upload of multi images the file names must be presented better	4
29. Do not close window of entering delivery address when clicking outside the window	4
30. Main page: display first image completely horizontally across entire screen, display product images below as boxes	8
31. Do not display steps in the upper order bar if they are not run through	3
32. Move order bar with white background downwards while scrolling, move right price overview downwards, especially if additional options such as A3 and A2 are activated.	4
33. Expandable details for right-hand price overview for both fields and prices	4
34. More price details: price understandable for binding and pages	5
35. Upload images to Cloudinary (username + PW are available)	10
36. Gallery images shall be uploaded in admin area	8
37. Activate discounts automatically by clicking on links visible on “first page” or “Newest” menu.	4
38. Editing the order must be possible in shopping cart -> go back to last step of order process	4
39. Enable removing uploaded file and uploading another file	5
40. Enable upload through drag and drop	8
41. Shopping Cart: Show bindings and CDs separately	5
42. If a shipping address is removed, then also remove it from the list of possible shipping addresses.	4
43. When registering, enter an address that serves as the default billing and delivery address in the shopping cart.	6
44. If there is no upload of thesis you still shall be able to go to the end of the order without adding the product to the shopping cart.	5
45. Admin area: For each binding possibility to add text and images to show in product information	4
46. Admin area -> binding -> DD -> deactivation of edition or classic shall be possible	5
47. If you change language during the order, you shall not go back to the first page of order	4

48. Calculate correct binding price during order	8
49. Some translations are missing (portrait/landscape, own cover/back sheet, one/two-sided)	16
50. Sandbox testing with PayPal	10
